

CARE GUIDELINES FOR EUGENIAS

| | |
|--------------------|---|
| Light | Full to Partial Sun. (Outdoors only). Minimum of 4 hours of direct sun daily |
| Temperature | Minimum of 32 degrees Fahrenheit. |
| Fertilizer | Slow release fertilizer recommended. Use 3/4 Tablespoons per 1 Gallon of container size. (Different brands may vary) |
| Water | <p>Water regularly. As conditions require.</p> <p>In Ground: Include in general lanscape irrigation schedule.</p> <p>In Pots: When watering, be sure to thoroughly moisten entire root zone.</p> <p>Rewater when top 3 inches of soil is dry. (Do Not allow topiary to fully dry out)</p> <p>* Pot must have drainage hole. * Drip Irrigation highly recommended.</p> |
| Size | Aging of Plants will result in a fuller topiary, not a taller one. |
| Maintenance | To maintain a formal appearance, trim excessive growth with a hand pruner. (Motorize pruners are not recommended). |
